

Interpreting Major Progressions Class 3#

Health, Vitality and Disease

Stellar Diagnosis

- "He who does not understand astrology is not a doctor but a fool."
- Hippokrates of Kos (460 BC – 370 BC)
- "The type and vigor of the physical cells, with their astral counterparts, which are attracted to the individual, are determined by the thought-built stellar cells and the manner of their organization, in his astral body. And it is because the birth chart—through mapping the thought compounds which enter into these stellar cells and mapping the relations between stellar structures built by these thought cells—gives a fairly accurate picture of the mental organization of the astral body that it affords a very accurate method of determining the length of life, and of diagnosing disease."
- –Delineating the Horoscope Vol. I - C. C. Zain
- HEALTH: = Ease, or the physical expression of stellar structures in the astral body which are vigorous and in harmony with one another.
- DISEASE: Is the expression of either weak stellar cells or stellar structures which are discordant with one another.
- "The chart is not the cause of a disease. Neither are the planets in the sky its cause. They merely show its presence and nature. The disease, or whatever the condition in life is under consideration, is attracted through the thought organization of the finer form. And this finer form is being modified by every thought and every experience of life. As it is thus

modified the fortune changes accordingly."

- –Delineating the Horoscope Vol. I - C. C. Zain

Inner/Outer Plane Interrelationship

- The astrological chart is a blueprint of the soul, or a cross section of the unconscious mind at the time of birth
- Progressed aspects can stimulate illness or discords which happen first on the Inner Plane before filtering down to the slower-moving Outer (Physical) Plane resulting in disease
- "Even as the physical cells and organs of the material body have intelligence and know how to perform definite functions, so also the stellar cells and stellar structures within the soul are intelligent, perform functions, and have desires which are not under the direct supervision of objective consciousness. Their intelligence is limited, but they know how to perform certain types of work, and how to exercise extra-physical power to bring about the physical events they desire. This extra-physical power by which the stellar cells attract not only health or disease, but influence also all other events that enter the life, is the same as that now recognized in our universities as the Psychokinetic Effect."
- Stellar Healing – C. C. Zain
- Just as the body is comprised of physical cells and organs, the soul or unconscious mind as represented by the astrological chart is comprised of thought cells and thought cell compounds
- Operating in a 4th dimensional realm our thought cells are stimulated by

Interpreting Major Progressions Class 3#

progressed aspects to express with vigor and harmony (health) or with weakness and discord (disease)

- Stimulating birth chart constants into expression, progressions create temporary windows of opportunity where illness can manifest
- “BECAUSE the astral body of man is composed of psychoplasm, organized into stellar cells and stellar structures, which determine the condition of the cells and tissues of the physical body, a map of these stellar cells and structures, such as the birth-chart and progressed planetary positions afford, provides an unusually reliable method of diagnosis.”
- Stellar Healing – C. C. Zain
- Temporary Stellar Aerials “These lines through the astral body which are mapped by aspects in the birth chart are called permanent aerials. But there are others which form when a planet by progression gets within one degree of the perfect aspect to another birth-chart, or progressed planet. These which pick up the energy of the two planets only during the time the planets are within one degree or less of their perfect aspect, are called temporary aerials.
- Both the permanent aerials and the temporary aerials are important not merely in matters of health and disease, but in every department of life. The amount of activity of any group of thought cells within the astral body at a particular time is determined by the amount of planetary energy which at that time it receives. This, in turn, depends upon the aerials, mapped by aspects, which at that time are picking and

transmitting planetary energy to this group of thought cells.”

- –Delineating the Horoscope Vol. I - C. C. Zain
- **Progressions are “Astral Weather Conditions”**
- In Hermetic Astrology the natal chart is considered to represent the most powerful influences which impact our character, consciousness, and life experiences
- From the time of birth forward the planets continue to move through the chart by what is called “progressed motion”
- These progressed aspects of the planets create temporary astral weather conditions which impinge upon our unconscious mind or soul and stimulate us to think, feel, and act in specific ways
- Our thoughts, feelings, and actions, in turn, attract specific trends of events and experiences

The Signs of the Zodiac Correspond to Zones of the Body:

- SIGN: = the corresponding zone in the body
- ARIES : The head, face, upper jaw, the cerebrum, (upper hemisphere of the brain)
- TAURUS: the neck, ears, palate, tonsils, cerebellum (lower lobes of the brain) larynx, pharynx and vocal cords.
- GEMINI: the shoulders, arms, hands, bronchi and lungs.
- CANCER: stomach, lower lungs and diaphragm.
- LEO: the back and spine.
- VIRGO: abdominal and intestinal region.

Interpreting Major Progressions Class 3#

- LIBRA: the kidneys, ovaries and lumbar region in general.
- SCORPIO: the rectal and reproductive region.
- SAGITTARIUS: the hips, thighs and sciatic nerve.
- CAPRICORN: the region of the knees.
- AQUARIUS: the lower legs and ankles.
- PISCES: the feet and toes.

- “Due to variation in human personality and character, these compartments of the astral body in which the stellar cells are retained are not related to the astral bodies of all people alike. In fact, although the order of sequence is always the same, otherwise there is the greatest difference. For instance, the stellar organization relating to money may, in one person’s astral form be in the neck, may in another person’s astral form be in the stomach, may in another person’s astral form be in the knees, and in still another person’s astral form may be in the feet.”
- Stellar Healing – C. C. Zain

- –*Delineating the Horoscope Vol. I-* C. C. Zain
- **PLANETS:** = specific trends of thinking (thought cell) and its relative strength or vigor & the organs of the body
- SUN: the heart, spleen, front pituitary and thyroid
- MOON: the stomach, fluidic and lymphatic system, back pituitary and thymus MERCURY: the nervous system, tongue, parathyroid, front pituitary.
- VENUS: the venous system, hair, skin, thyroid and gonads.
- MARS: the muscles and sinews, adrenals, gonads and the hemoglobin of the blood.
- JUPITER: the arterial system, liver, pancreas, and the fat cells,
- SATURN: the teeth, bones, spleen and adrenals.
- URANUS: the nervous system, parathyroid, front pituitary
- NEPTUNE: the pineal gland and parathyroid
- PLUTO: pineal gland, front pituitary and adrenals

The Planets Correspond to the Organs

- “Now as the physical body is a replica of the astral body in so far as physical materials are at hand for that purpose, it follows that every group of thought cells within the astral body has some influence over the health. Each represents the inner condition of which the corresponding physical tissues and functions are the more external manifestation. Therefore, in considering the health, and the type of disease toward which an individual is predisposed, no planet in the chart should be neglected.”

- The SUN afflicted is a Birth-Chart Constant of high blood pressure, infantile paralysis, pneumonia, and diseases of the spine. In heart disease, the most common of all fatal afflictions, the Birth-Chart Constant is an affliction in Leo, or the Sun severely afflicted. The Progressed Constant is a progressed aspect made by the Sun, or a progressed aspect to a planet in Leo; with discordant rallying forces.

- The MOON is always involved in dropsy, is often a factor in mental

Interpreting Major Progressions Class 3#

complaints, is involved with Mars in the various types of eye trouble, and with Saturn in afflictions to the ears. It may also affect the stomach.

- MERCURY is involved in nervousness, certain mental troubles, neuralgia, neuritis, sciatica, hay fever, asthma and some bowel complaints.
- VENUS tends to affect the kidneys, the venous blood stream, the thyroids and the internal sex organs. Either Venus or Mars may be involved in the so-called social diseases and in female trouble.
- MARS when prominent and afflicted invites infection, inflammation and the contagious diseases such as smallpox, measles, scarlet fever and chickenpox. It is a factor in burns, typhoid, malaria, blood poison and rheumatism, as well as in some kidney troubles and in urinary complaints.
- JUPITER afflicts through over abundance of something. Some acidosis, one type of diabetes, and biliousness, catarrh, auto-intoxication, carbuncles and fatty tumors are under his influence.
- SATURN always afflicts through a deficiency. His typical diseases are cancer, fibrous tumor, tuberculosis, pellagra, atrophy and constipation.
- URANUS has for typical diseases, appendicitis and paralysis; but is also a factor in arthritis, infantile paralysis and nervous complaints.
- NEPTUNE tends to a negativeness which permits invasion by bacteria, and to the formation of moist pockets of infection, which may be quite hidden or may develop into ulcers.
- PLUTO also tends to negativeness and a high degree of sensitiveness which encourages invasion by other

organisms and invites hives, hay fever and asthma when Mercury also is involved.

- *–Delineating the Horoscope Vol. I-*
C. C. Zain
- “The zones of the body affected by disease are indicated by the zodiacal signs. Power has some influence, but as a general rule the more discordant the sign in the chart of birth the more apt it is to be the region attacked by disease. In stellar diagnosis we select the heaviest afflictions as indicating the types of disease toward which there is a predisposition—the one having the most discordynes indicating the type of disease toward which there is most predisposition—and the sign having the most discordynes as the region, other things being equal, most likely to be attacked. In stellar diagnosis, therefore, it is especially desirable to use a more precise method of gauging both birth-chart and progressed harmony and discord than the flat-rate method of inspection.”
- Stellar Healing – C. C. Zain

The Houses and Health

- **HOUSES:** = dept. of life, areas of activity which can influence the health
- Discordant trends of thinking about the affairs governed by any specific house can negatively impact the body zones or systems governed by the sign on the cusp of that house or the planets found in that house
- “Thoughts, feelings and impulses are the foods of the astral body, and each type of mental food has an affinity for some one of the twelve compartments of the stellar makeup.

Interpreting Major Progressions Class 3#

Thoughts and feelings which revolve around the personality, immediately they are assimilated, move into section one of the astral body.

Thoughts and feelings about money move into compartment two.

Thoughts and feelings about brethren, studies and travels quickly congregate together in the third well defined region of the astral form, and so on.”

- Stellar Healing – C. C. Zain
- The astral body or Soul is composed of thought cells or stellar cells. It is no more homogeneous than the physical body which is composed of protoplasm and chemicals in the various proportions which comprise bony, muscular, nervous tissue etc.
- Likewise the inner plane body is grouped in families of similar properties governed by the planetary urges.

The Law of Affinity

- Like attracts like - You are what you think
- **THE LAW OF AFFINITY** allows the structures and activities of the finer form or Soul to attract corresponding structures into the external life.

Vitality

- “The positive, electric energy is that which gives vitality and recuperative power; and its abundance, vigor and persistence is indicated by the Sun in a birth chart.
- Vitality, therefore, but not health nor length of life, may be judged from the house position, sign location and aspects of the Sun in any birth chart.
- –*Delineating the Horoscope Vol. I*- C. C. Zain

- “While an affliction of Mars to the Sun indicates discord where the constitution is concerned, which is sure thus to be a source of trouble and perhaps disease, yet any aspect of Mars to the Sun, in either a man’s chart or a woman’s, adds vital power. Mars is the planet of energy, and this energy added to the solar vitality tends to prolong the life. Of women beyond seventy years, 77% have some aspect of Mars to the Sun in their birth charts. Of men beyond seventy, 74% have some aspect of Mars to the Sun in their birth charts.”
- –*Delineating the Horoscope Vol. I*- C. C. Zain

THE IMPORTANCE OF THE SOLI-LUNAR ELECTROMAGNETIC BODY

- The power and harmony of the Sun and Moon are essential in determining good health.
- **THE SUN:** positive polarity, electric, vital, ego or self esteem, power, abundant vigor and persistence. Any aspect between the sun and Mars add power to a chart.
- **THE MOON:** negative polarity, magnetic, feminine, soothing, constitutional magnetism, open, receptive, the unconscious mind or soul, subliminal thinking, mentality, tenacity and recuperation.
- “The Moon maps the most receptive planetary terminal in the astral body, the place where impressions both from the external world and from the inner plane reach the unconscious mind. It maps where energy of great volume, regardless of its character, is picked up and transmitted to the finer form. This is a negative region, and any stellar aerial reaching it, as

Interpreting Major Progressions Class 3#

mapped by an aspect to the Moon, or even by the swiftly recurring progressed aspects of the Moon, carries the energy of the planet thus indicated freely into the astral body.”

- –*Delineating the Horoscope Vol. I*- C. C. Zain
- “The life of the body is electromagnetic. The positive, electrical energies are ruled by the Sun. On their power and harmony depend the vitality and the recuperative ability.
- The negative, magnetic energies which nourish the constitution, and are essential in maintaining health, are ruled by the Moon. It is the interaction of the solar electrical energy with the lunar magnetic energy that provides the nerve currents and gives that which we call life to the physical body.”
- Stellar Healing – C. C. Zain
- “While the Moon governs the constitutional magnetism, it is only one factor, although the most important one, in gauging the strength or weakness of the constitution, and therefore whether or not the individual is readily attacked by disease. As indicated in the statistics relative to the individuals who lived more than 70 years, a powerful and harmonious Moon contributes markedly to length of life. It indicates ability of the constitution to resist disease.”
- Stellar Healing – C. C. Zain
- “Ability to survive does not depend solely on the strength and harmony of the vitality, or solely on the strength and harmony of the constitution. However weak and

discordant the constitution, the individual, in spite of recurrent and serious illness, will recover and live to a good age if the Sun is powerful and harmonious enough. And however weak the vitality, the individual will have little illness while he does live if his constitution is powerful and harmonious, although he may not live to any great age.”

- Stellar Healing – C. C. Zain

LENGTH OF LIFE

- **LENGTH OF LIFE:** is the balance between the weaknesses of the body and the strength of the vital electric energy which sustains it.
- “The individual dies when, coincident with heavy discordant major-progressed aspects, the constitution becomes too weak to enable the vital recuperative power of the Sun to counteract that weakness and discord. Maintaining life depends upon the relative power and harmony or discord of these two factors.”
- Stellar Healing – C. C. Zain
- “While the Moon governs the constitutional magnetism, it is only one factor, although the most important one, in gauging the strength or weakness of the constitution, and therefore whether or not the individual is readily attacked by disease. As indicated in the statistics relative to the individuals who lived more than 70 years, a powerful and harmonious Moon contributes markedly to length of life. It indicates ability of the constitution to resist disease.”
- Stellar Healing – C. C. Zain

Interpreting Major Progressions Class 3#

Influence of Mercury on Health

- **MERCURY: influences health through the objective thoughts and the nervous system. Mercury represents our habitual trends in thinking**
- “Furthermore, these thoughts which come under Mercury’s rule are fed by the individual’s mental activities into his astral body. They represent his habitual trend in thinking, and therefore, whether he is adding elements and compounds to his astral form which conduce to, or detract from, a condition of health.”
- *–Delineating the Horoscope Vol. I- C. C. Zain*
- “Mercury is truly the messenger. The electromagnetic energies which flow over the nerves are furnished by the Sun and Moon; but the vibratory rate to which these currents are tuned is determined chiefly by the thoughts and feelings of which the individual is objectively conscious. The thoughts and the nerve currents are ruled by Mercury.”
- Stellar Healing – C. C. Zain

THE ASC, 1ST HOUSE, & 6th house

- **THE ASC & 1ST HOUSE:** represent the physical body. The Asc. is the grounding wire of the astral form to the physical body. Consideration must be given to planets in the 1st house as well as the sign found on the 1st house cusp.
- **6th house:** represents the zone of least resistance. It is a weak zone within the chart which maps experiences with illness and labor.
- “Any planet in the house, and to a lesser extent the planet ruling the cusp of the house, because it connects up so directly with the

physical body, has an influence over the health. A malefic planet here, or one afflicted, indicates a corresponding impairment of the physical body. But, because the house is so strong, such an affliction is less inimical to the health than the same planet located in the sixth house.

- The degree upon the ascendant maps a heavy line running across the astral body, which can be seen clairvoyantly. This is not merely an astral line, but a line of electromagnetic energy also through which the whole astral body is grounded. Aspects to this ground wire, or ascending degree, act, where health and personality are concerned as do aspects to the planets. They are almost as important as the aspects to the Sun, Moon and Mercury.”
- *–Delineating the Horoscope Vol. I- C. C. Zain*
- “All those thoughts, feelings and impulses of the past which have been associated with illness and labor have entered into the thought compounds and form the stellar cells of, that compartment of the stellar body mapped by the sixth house. Less planetary energy reaches this compartment, normally, than flows through any of the other twelve compartments of the astral body. As a consequence, the sixth is the weakest house of them all, and marks the bodily zone of the least resistance.”
- *–Delineating the Horoscope Vol. I- C. C. Zain*
- “Furthermore, our statistical studies of thousands of charts at the time their owners became ill, as set forth in the B. of L. Astrological Reports,

Interpreting Major Progressions Class 3#

indicate that, except when a disease is present from birth, or is an inconsequential minor ailment, an individual becomes ill only at those times when there is a major-progressed aspect, other than from the Moon, to the ruler or co-ruler of the sixth house.”

- –*Delineating the Horoscope Vol. I*– C. C. Zain
- “In addition to planetary aerals, the clairvoyant discerns a heavy line running across the astral body in the region marking the sign and degree on the Ascendant of the birth chart. When the birth hour is not known, if this line can be seen, the proper Ascendant can be determined. The ascending degree may also have aerals stretching to the planetary terminals, as may the degree on the M.C. But the Ascendant is unique in that it acts as the grounding wire. That is, it is where the person connects, and exchanges energy through the electromagnetic body and its forces, with his immediate environment.”
- *Stellar Healing* – C. C. Zain
- “Permanent aerals always have a pronounced influence upon the condition which develops. But a physical disease only develops, except when present from birth, when there is a major-progressed aspect of some kind to both a ruler of the first house and to a ruler of the sixth house. These temporary aerals are necessary to carry the rallying forces present into those compartments having to do with health and disease.”
- *Stellar Healing* – C. C. Zain
- **ASTRODYNES:** are one of the best techniques for determining the relative power, harmony and discord within a chart. It indicates the areas of strength and disease. In general the heaviest afflictions in a chart indicate the diseases to which an individual is predisposed.
- “Every planet in the chart maps the state of activity of the most energetic thought cells in its particular region of the astral body, maps where the most active group of this type is located, and by its harmony or discord (the number of harmodynes or discordynes) indicates the strength of the desires of the thought cells there located for health or disease. Even the Sun, in addition to mapping the stellar cells on whose activities and desires the vitality and recuperative power depends, also by its power and harmony or discord indicates the condition of the physical tissues in that region of the physical body and to what extent (as shown by the number of harmodynes or discordynes) the Sun stellar cells work to attract health or the diseases characteristic of the Sun.
- In determining the ability of the constitution to resist disease, therefore, the power and harmony or discord of every planet and sign must be taken into consideration.”
- *Stellar Healing* – C. C. Zain
- **PROGRESSED ASPECTS**
- **PROGRESSED ASPECTS:** create temporary stellar aerals attracting harmonious or discordant events as well as health or illness.
- Hermetic Astrology works with ten distinct aspects

Interpreting Major Progressions Class 3#

- Aspects are the angles at which planetary forces join as they radiate towards earth
 - Aspects add energy (power) to any chart
 - Aspects contribute conditioning energy (harmony or discord)
 - “Statistical study of thousands of charts, made in the preparation of our Astrological Reports on the various diseases indicates that, except when a disease is present from birth, the individual becomes ill only when there is a major-progressed aspect, other than from the Moon, to the ruler or co-ruler of the first house. Minor complaints which afterwards are considered inconsequential, of course, are not thus included.
 - The aspect may be either discordant or harmonious, but the energy from the aspect responsible for stimulating the stellar cells of the astral body discordantly, can only reach and influence the physical body markedly when there is a stellar aerial, mapped by a progressed aspect which is within one degree of perfect, carrying energy to the first house.”
 - *–Delineating the Horoscope Vol. I- C. C. Zain*
 - The potency of the ten aspects expresses from mild to extremely powerful
 - Their conditioning energy can be either harmonious, discordant, or neutral
 - **ASPECTS:** = stellar aeriels which add harmonious, discord and neutral conditioning. We must determine if the thought-cells are in harmonious cooperation or rebellion with one another
 - Neutral: \times || \ddagger σ
 - Harmonious: \sphericalangle * \triangle
 - Discordant: \sphericalangle \square \square σ°
 - ♀ Venus adds ¼ harmony
 - ♃ Jupiter adds ½ harmony
 - ♂ Mars adds ¼ discord
 - ♄ Saturn adds ½ discord
 - The nature of the progressed aspect contributes in part to type of events attracted
 - The relative conditioning energy of a planet or sign in the natal chart can indicate predispositions towards health or disease that are stimulated by progressions
- CORRECTING DISEASE**
- **CORRECTING DISEASE:** is accomplished in one of three methods. The desires of the thought cells must be changed through Mental Alchemy, Conversion and/or Rallying Forces.
 - Interpreting progressions is an “art”
 - You must take into consideration the education and training of the individual, and the mental habit-systems he or she has cultivated
 - Focus only on the characteristics of the planets involved and the houses involved
 - Eliminate concepts that are improbable due to birth chart predispositions
 - You must consider the age of the individual and what events may be likely or unlikely based on the natural chronology of life events
 - Note whether or not the environment in which the individual lives can allow the event to find full expression
 - Whether or not a progressed aspect attracts fortunate or unfortunate

Interpreting Major Progressions Class 3#

events is determined less by the nature of the aspect by progression and more by the conditioning of the planet in the natal chart

- The more powerful of the two planets in the natal chart tends to be the stellar aerial that receives the greater stimulus
- One can have an aspect and not attract an event
- A major progression can attract an event with no other reinforcement
- Major Moon progressions, Minors, and transits can help narrow the timing of events by adding thought-cell activity
- “The Brotherhood of Light Astrological Research Department began in April 1924, to solicit data, and since that time has collected, erected, and progressed according to this Hermetic System, many, many thousands of birth charts to the time of some given event. The Progressed Constants for each of the 160 different diseases considered in Course XVI, *Stellar Healing*, for each of the diseases considered in the book, *Body Disease and Its Stellar Treatment*, and for each of the events considered in the book, *When and What Events Will Happen*1, were ascertained in this manner.”
- *Progressing the Horoscope* – C. C. Zain
